Hi Eric! Rob wanted me to let you know that the proposed sample locations still need to be prioritized. We are not proposing 6 sample locations for the pilot study; these are the six locations for us to consider further. I believe Jen and Jeremy were going to review and prioritize.

At this point, the plan is to have the "technical" conference call with LWG on Monday at 2pm. Hopefully, the 3 proposed sample locations can be finalized prior to that call.

Thanks for all your help and support.

~hugs,
rose

Hey Y'all,

Managed to pull this together yesterday (b) (6)
(b) (6) (luckily power outlets were available because my battery was completely dead). Anyway ... two files attached. One showing proposed sampling locations along with tox data and predicted benthic risk. I also looked at sediment concentrations of various contaminants in placing these points. So the other attachment provides a summary of chemicals that exceeded eit

ll today. (b) (6)
(b) (6).

Talk to y'all soon.

-R
